InfraMetrics® Debt Indices (LCU)

The InfraMetrics Debt Indices track the performance of private debt issued by global infrastructure corporates and project companies. The Infra300 Debt Index reflects the monthly performance of recent senior debt from 300 unlisted infrastructure companies. The companies are selected form a representative sample by TICCS categories of an underlying universe of close to 9100+ firms in 27 countries. The Infra100 PF (Project Finance) Debt Index and Infra100 Debt Index track the latest 100 senior debt instruments issued by project finance SPVs and private infrastructure companies, respectively, both ranked by total senior borrowing. All indices are equally weighted and denominated in local currencies.

TICCS® or The Infrastructure Company Classification Standard (and its ESG extension TICCS+) is a classification system for infrastructure investments. Created in 2018, it is now used by investors in unlisted and listed infrastructure areas and has been adopted by many investors as the default system to organise their portfolio according to 4 pillars: business risk, industrial activity, geo-economic exposure and corporate structure. Since 2022 TICCS is also mapped to NACE and the EU Taxonomy.

TICCS is a robust, risk-focused, dynamic classification system focusing on global infrastructure investments that is reviewed every two years as new markets and companies are added to the infraMetrics® database.

Credit risk buckets: Probability of default distribution across defined risk buckets Low : (0 to 1)% , Mid : (1 to 10)% , High : (>10%).

Without limiting any of the foregoing, in no event shall any of the Scientific Infra & Private Assets Parties have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits), even if notified of the possibility of such damages.

All Scientific Infra & Private Assets Indices and data are the exclusive property of Scientific Infra & Private Assets. Infomation containing any historical information, data or analysis should not be taken as an indication or guarantee of any future performance, analysis, forecastor prediction. Past performance does not guarantee future results. In many cases, hypothetical, back-tested results were achieved by means of the retroactive application of a simulation model and, as such, the corresponding results have inherent limitations.

The Index returns shown do not represent the results of actual trading of investable assets/securities. Scientific Infra & Private Assets maintains the Index and calculates the Index levels and performance shown or discussed but does not manage actual assets. Index returns do not reflect payment of any sales charges or fees an investor may pay to purchase the securities underlying the Index or investment funds that are intended to track the performance of the Index. The imposition of these fees and charges would cause actual and back-tested performance of the securities/fund to be lower than the Index performance shown. Back-tested performance may not reflect the impact that any material market or economic factors might have had on the advisor's management of actual client assets.
