PECCS or PrivateE Company Classification Standard is a classification system tailor-made for private markets and classifies private companies across 5 objective and independent pillars. The classes in each pillar are exhaustive and mutually exclusive. Please refer to the complete description of the PECCS classification scheme [here](#).

Private2000 is a global flagship equity index of private companies from the Private Equity-backed Universe or PEU with the highest valuation in each country-sector according to the latter's economic contribution. PEU is constructed from the Broad private Market Universe (BMU) by filtering for size and profits that resemble PE portfolio companies. The BMU comprises over 1.2 million eligible private companies from over 150 countries that are for-profit, not publicly listed, not majority government-owned, not part of infraMetrics, and have at least USD 1 million in revenue.

Without limiting any of the foregoing, in no event shall any of the EDHEC Infra & Private Assets Parties have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits), even if notified of the possibility of such damages.

All EDHEC Infra & Private Assets Indices and data are the exclusive property of EDHEC Infra & Private Assets. Information containing any historical information, data or analysis should not be taken as an indication or guarantee of any future performance, analysis, forecast or prediction. Past performance does not guarantee future results. In many cases, hypothetical, back-tested results were achieved by means of the retroactive application of a simulation model and, as such, the corresponding results have inherent limitations.

The Index returns shown do not represent the results of actual trading of investable assets/securities. EDHEC Infra & Private Assets maintains the Index and calculates the Index levels and performance shown or discussed but does not manage actual assets. Index returns do not reflect payment of any sales charges or fees an investor may pay to purchase the securities underlying the Index or investment funds that are intended to track the performance of the Index. The imposition of these fees and charges would cause actual and back-tested performance of the securities/fund to be lower than the Index performance shown. Back-tested performance may not reflect the impact that any material market or economic factors might have had on the advisor's management of actual client assets.
